CHATBOX

Samuel LaPolla[2]: should I find proper unicodes to represent the arrow combinations as well as symbols that represent certain items? The heavy arrows █████ are the actual ones used in-game. Does the cover I made look good?

Story

Storyline

REMINDER FOR DMS TO USE CUTSCENES AS MUCH AS POSSIBLE SO THE 1s TURNS DONT TAKE UP THE WHOLE GAME AND SO THAT YOU MAY COMPLETE A FULL MISSION PER CAMPAIGN!!!!!!

Uh depending on what faction they pick to fight, You're sending them to the worst planet in that faction. Good luck... for bugs its hellmire, bots is menkent, and for the squids it is Hort. hellmire has EVERYTHING the bugs can throw at you, menkent has HELL on earth with both the jetpack brigade and burner corps with dust storms and FUCKING FIRE TORNADOES EVERY 30s. Hort just has appropriators and shitty terrain with bad weather storms. The helldiver's story starts at boot camp, the sergeant is scolding them for running off and alerting a nest of terminids. He tells them "what makes YOU of all people think that you can just go goofing off during a goddamn GALACTIC WAR huh?" [wait for response]. He starts yelling again before you can finish talking, "IF YOU REALLY THINK YOU HAVE WHAT IT TAKES TO FIGHT FOR SUPER EARTH THEN WHY DONT YOU TAKE THE HELLDIVER EXAM AND JUST SKIP THE TRAINING THEN?!" this takes them to the training field where the instructor(the dm) tells them how the training works, then immediately sends them to defeat a nest of terminids. They start by learning how to reinforce, how to stim, and how to dive to dodge turrets.

After that they go on their first mission, it is on hellmire with the rupture strain, hive lords, and it is a hive world. Their mission is a blitz search and destroy mission.

Difficulty Tiers

Icon	Tier	Description	[sc&cc bonus%, warbonds on missions 1, 2, and 3, missions amount)	Enemy frequency(
	1-Trivial I	Low cortisol core:	[0%, 1, 1]	
	2-Easy II	Relaxing if you forget about the demons from hell hunting you down.	[10%, 2, 1]	

	3-Medium 	Still easy, but its way worse form here on out	[25%, 2/4, 2]	
	4-Challenging 	This one has way less chill than medium but not impossible	[50%, 3/5, 2]	
	5-Hard 	Look at the name, you're gonna sweat bullets	[75%, 4/6/8, 3]	
	6-Extreme 	Like trying to kill a dictionary	[100%, 5/7/9, 3]	
	7-Scuicide Mission 	Again, look at the name, you WILL die	[150%, 6/8/10, 3]	
	8-Impossible 	Its possible, just not most of the time	[200%, 7/10/12, 3]	
	9-Helldive 	You have something mentally wrong with you ATP	[250%, 8/11/14, 3]	
	10-Super Helldive 		[300%, 9/12/15, 3]	

Equipment

The number in the curved brackets is the {damage per round, rounds per mag, total mags, rounds per second(1 in battle turn to make it easy)}. A / mark means that it swaps between or changes to that attribute, and a & sign or no / sign means it always has that attribute. For stratagems the {} are just damage also check the support weapon category for shortened terms..

Stims heal full hp in one turn and continue healing for one more turn.

DPS = damage per second.

If there is a bullet point(s) below a weapon or armor name that is because all the stats dont fit in one bar and I also may have needed to add important info about it.

Primary

Assault rifle

Level 1

AR-23 Liberator [2] (+b) {90(b), 45,
8, 11} **

StA-52 Assault Rifle [2] (+b) {90(b), 56,
6, 11} **

Shotgun

Level 1

SG-8 Punisher [2](+b){405(b), 16, 60, 2}*SlowLoading*

Level 2

SG-8S Slugger [3](+b){330(b), 16, 60, 2}*SlowLoading*

SG-225 Breaker [2](+b){330(b), 16, 7, 5}**

Level 3

SG-20 Halt [3/2](+b){385(b)/120(b), 16, 60,
2}*SlowLoading*

- AP3 does 385(b) and the other AP does the 120(b)

DBS-2 Double Freedom [3](+b){840(b), 2, 40,
2}*SlowLoading*

Level 4

SG-225SP Breaker Spray&Pray [2](+b){240(b), 26, 8,
5}**

SG-451 Cookout [2](+b+f){320(b), 16, 60,
2}*SlowLoading*

SG-97 Sweeper [3](+b){504(b), 7, 70, 2}*SlowLoading*

Level 5

SG-225IE Breaker Incendiary [2](+b+f){240(b), 26, 4,

M90A Shotgun [2](+b){605(b), 6, 44, 1}*SlowLoading*

Explosive

Level 4

R-36 Eruptor [4](+b+e){230(b)&225(e), 5, 6, 1}**

Level 5

CB-9 Exploding Crossbow [3](+b+e){270(b)&350(e), 5, 8,
1}*1hand*

Energy-based

Level 1

LAS-16 Sickle [2](+l){60(b) 84, 3, 12}*heat*

Level 2

SG-8P Punisher Plasma [3](+e){255(e), 10, 8, 2}**

- 1m explosion radius

PLAS-1 Scorchers [3](+b+e){100(b)100(e), 20, 5, 6}**

Level 3

PLAS-101 Purifier [3] (+b+e) {100-200(b)75-300(e), 15, 6, 15}*CH*

- Side note that the ballistic damage has an AP of 2 and the explosion has an AP of 3 made me decide it would be easier to just write it as just an AP of 3. The explosion has a 1.5m radius.

PLAS-39 Accelerator Rifle [3](+b+e){250(b)&100(e), 9, 12, 9}*Burst*

- 1m explosion radius

LAS-5 scythe [2] (+f+l){350(l)100(f), 8s, 4, 1s}*Heat*

Level 4

ARC-12 Blitzers [3] (+z) {250(z), ∞, ∞, 1}**

LAS-13 Trident [2] (+l) {1800(l), 2s, 3, 1s}*Heat*

- Shoots 6 laser pellets at once.

Level 5

LAS-17 Double-Edge Sickle [2] (+l) {700, 15s, 3, 5s}*H*

- Over time it gets hotter, eventually starting to deal 5dps to you after 12 seconds of firing constantly.
- at 6 seconds it becomes AP [3] with 640 dps, after 10s it becomes AP [4] and 815 dps.
- Its measured in dps
- I'm letting you shoot 3s worth of ammo at a time because if you're dumb I'm not gonna stop you, but you're gonna die if you shoot the 3s of ammo 5 times.

Special

VG-70 Variable [2] (+b) {85(b), 49, 7, 5/9/12}*%Burst*#3#

- Has 3 rpms, r1, r2, and r3. Also can have 3 extra firing modes, total which fires all the ammo, volley shoots 1/7 of the total ammo in a magazine or if you don't have that much it shoots what you got left. Auto is obviously fully automatic. Firing speeds do not affect volley and total because volley can shoot 3 times a second killing all your ammo. Total is obvious why.
- Shooting while in total ammo mode counts as one bullet. Shooting while on volley also does the same except counts for how many times you shoot it.

FLAM-66 Torch [4] (+f) {150(f) 100, 6}**#4#
 JAR-5 Dominator [3] (+b) {275(b), 15, 6, 5}**Burst**#3#

Secondary Pistol

Level 1

P-2 Peacemaker [2] (+b) {100(b), 15, 8, 15}*1Hand*

Level 2

P-19 Redeemer [2] (+b) {70(b), 31, 4, 18}*1Hand*

P-69 Veto [3] (+b) {105, 12, 90, 12}*1Hand&SlowLoading*

Level 3

M6C/SOCOM Pistol [2] (+b) {125(b), 12, 8, 12}*1H&SP*

P-112 Verdict [3] (+b) {140(b), 10, 8, 7}*1Hand*

Level 4

P-92 Warrant [3] (+b) {80(b), 13, 7, 7}*1Hand&Guided*

Level 5

P-4 Senator [4] (+b) {225(b), 6, 40, 3}*1H&SL*

Melee

Level 1

CQC-2 Saber [3] (+m) {188, ∞, ∞, 3}*1Hand*

- Has 2m range
- Can hit 4 enemies at once with max roll

Level 2

CQC-73 Entrenchment Tool [3] (+m) {165, ∞, ∞, 2}*1Hand*

- 1.75m range
- Can hit 3 enemies at once
- Can build trenches up to 6 ft deep that make you and your team 75% less noticeable to enemies who have not seen you yet.

Level 3

CQC-19Stun Lance [3] (+m) {165, ∞, ∞, 2}*1H&Stun*

- Has a +1 meter range of attack making it have a 3m range
- Can hit 3 enemies at once with max roll

CQC-30 Stun Baton [3] (+m) {120, ∞, ∞, 3}
1Hand&Stun

- Has a 2m range
- Can hit 3 enemies at once with max roll.

Level 4

CQC-5 Combat Hatchet [3] (+m){240, ∞, ∞, 2}
1Hand

- Has 2m range
- Can hit 3 enemies at once with max roll.

Level 5

CQC-42 Machete [3] (+m) {300, ∞, ∞, 2}
1Hand

- 2m range
- Can hit 5 enemies with max roll

Special

Level 2

LAS-7 Dagger [2](+f+l){250(l)100(f), 6s, 3,
1s}*1Hand&Heat*

Level 3

P-72 Crisper [4](+f){150(f), 50, 4}*1Hand*

P-11 Stim Pistol [-1](+b){0(b), 6, 24,
1}*1H&SL&Stimulates*

PLAS-15 Loyalist [3](+b+e){75-150(b)75-225(e), 8, 5,
8}*1H&CH*

- To get 100% charged shots wait 0.5 seconds of charging before firing, meaning you can only fire 2 fully charged shots per turn.
- If you want to fire some 60% charged shots you get 3 shots like that per turn and they deal 120(b)165(e) per shot hit.
- If you want 30% charged shots then you get 6 30% charge shots per turn that deal 97.5(b)120(e) damage per shot.

LAS-58 Talon [3](+b){200(b), 7, 3, 7}*1Hand&Heat*

- Can regain 3 ammo per turn of not firing the weapon if you let it cool down before you shoot all its ammo

Level 4

GP-31 Grenade Pistol [3](+b+e){250(b)400(e), 1, 6,
1}*1H&SL*

- You can fire once every other turn, trust me that there are good reasons for it being this slow

P-35 Re-Educator [4](+g){60(g), 6, 2,
2}*1H&Caustic*
SG-22 Bushwhacker [2](+b){405(b), 3, 30,
3}*SlowLoading*

Level 5

P-33 Missile Pistol [3&5](+b+e){1000(b), 300(e), 1, 3,
1}*1H&GW*

- Projectile has armor pen 5, and is the ballistic damage.
- Explosion has 3 AP.

GP-20 Ultimatum [6](+b+e){1000(b)2000(e), 1, 1,

1}*1H&SL*

- After firing, wait 2 turns before using this weapon again

Throwables/Grenades

Grenade's curved bracket's stats are in this order {damage(type of damage), radius, fuse time, capacity} you can throw 2 grenades per turn.

In the fuse time IE means impact explosive, it blows up on contact with anything. PX in the cooldown area means it blows up once you get within proximity.

Standard

Level 1

G-12 High Explosive [4](+e){800(e), 7m, 4s, 4}

Level 2

G-6 Frag [3](+e+b){500(e)110(b), 10m, 2s, 6}

- The ballistic damage is from shrapnel which you roll to determine how much of it hits, there is x35 shrapnel total. They shrapnel all do 110 ballistic and only 4 can hit a single enemy, no exceptions.

Level 3

G-10 Incendiary [3](+e+f){300(e)100(f), 7m, 3s, 4}

Level 4

G-7 Pineapple [3](+e){300(e)100(e)300(b), 10m, 3s, 4}

- Once the main one blows up it releases 18 bomblets that deal the 100(e)300(b) damage you see, they explode on impact, they have a 3m radius.

Level 5

TED-63 Dynamite [4](+e){1000(e), 12m,
5s/15s/60s, 3}

Special

Level 1

G-3 Smoke [-1](+e){0(E), 8m, 3s, 5}

- Creates a smokescreen obscuring the enemy's view allowing you to escape an enemy patrol that just spotted you or make it out of a hulk's line of fire.

G-23 Stun [6](+e){0(e), 10m, 2s, 4}

Level 2

K-2 Throwing Knife [3](+b){300(b), N/A, N/A,
20}

G-109 Urchin [6](+e){0(e), 4m, 3s,
4}*Sticky&Stun*

G-89 Smokescreen [-1](+e){0(e), 5m, IE, 5}

- Creates a smokescreen obscuring the enemy's view allowing you to escape an enemy patrol that just spotted you or make it out of a hulk's line of fire.

Level 3

G-16 Impact [4](+e){400(e), 7m, IE, 4}

G-142 Pyrotech [7](+e+f){50(e)20(f), 5m,
2.9s, 6}

- When it blows up it spins for 5 seconds dealing that amount of fire damage every turn you're within its range.

G-4 Gas [6](+g){10(g), 7m, 3s, 4}

TM-1 Lure Mine [5](+e){1000(e), 8m, PX,
4}*Sticky*

G/SH-39 Shield [-1](+e){0(e), 1.8m, 0s, 4}

Level 4

G-13 Incendiary Impact

[3](+e+f){150(e)100(f), 7m, IE, 4}

G-50 Seeker [4](+e){500(e), 7m, IE, 4}

- When thrown it will follow you around while flying in the air looking for enemies. It will zip over to any enemy it sees, but if it sees many it goes for the largest one.

G-31 Arc [4](+z){100(z), 10m, 3s, 5}

- After it hits the ground it releases a burst of electricity after the cooldown happens, then it will just immediately shock and bounce on contact after the first burst of electricity. It explodes a total of 5 times.

Level 5

G-123 Thermite [7](+e+f){2000(e)150(f), 2m, 3s, 3}

- It does 150(f) every second for 6s after exploding

G-48 Giga grenade [5](+e){2000(e), 12m, IE, 2}

Damage & attributes

Weapon Attributes

The asterisk hold attributes which determine a weapon's functions

Suppressed

Makes less noise, this means the enemies will spot you less of the time when you fire your weapon.

1hand

It only requires one hand allowing the use of one-handed shields that you otherwise would not be able to use with things like shotguns, rifles ect...

Slowloading

Reload each round at a time, AKA rounds reload. Instead of the spare ammo being magazines it is all the spare rounds. Also it just means you need to dedicate 1 whole turn to reloading. You dont need to reload non-slowloading weapons because it happens at the end of your turn.

Burst

Shoots in bursts, if it has a % before the first letter then it can be changed to other firing speeds/types during a mission

Heat

Their ammo is most of the time counted in seconds of usability before you need to cool down/reload. If the heat coil(magazine) is not fully used it will regain 1 turn of use after not using it for 1 turn. 1 turn is = 1s(second). If it is not measured in seconds assume it uses bullets and can shoot the amount magazine ammo before it overheats.

Charged

Charge up to attack. That's literally it, go have fun I guess!

Guided

Can swap between a mode that automatically locks onto enemies while shooting making the amount yo have to roll to get full damage decrease by -5

Stun

Stuns the enemy for one turn so that cant defend themselves from the power of democracy. It won't be inflicted to enemies that are too large or too armored.

Stimulates

Stims people you shoot, it doesnt heal the bugs i promise...

Caustic

When hit, enemies become confused and start attacking anything including their friends and yours. It slows them by 25% while inflicted, this is a modifier to the gas effect and is only active while the gas effect that is caused by a weapon with this attribute is still active.

Throwable Attributes

Sticky

If it lands it sticks to the enemy until it explodes and is gone, +10 chance to hit the enemy when rolling to throw a grenade.

Stun

When it goes kaboom the enemy is stunned for one turn, while theyre still alive that is.

Armor attributes

The attributes are how the armor functions in a mission. They will be displayed next to the stats in asterisks

Servo-Assisted

Increases throwing checks by +4. Provides +50% limb health(not added to main hp pool).

Scout #1#

Markers placed on the map will generate radar scans every 2 turns. Adds a +2 to all stealth checks.

Engineering Kit #2#

Further increases accuracy checks by +2 when crouching or prone. Increases holding capacity of throwables by +2.

Fortified #2#

Further increases accuracy checks by +2 when crouching or prone. Provides 50% resistance to explosive damage.

Extra Padding #0#

Provides a higher armor rating.

Med-Kit #2#

Increases initial inventory and holding capacity of *stims* by +2. Increases stim effect duration by 2.0 turns.

Electrical Conduit #4#

Provides 95% resistance to arc damage.

Peak Physique #2#

Increases melee damage by 40%. Improves accuracy checks by +3.

Inflammable #3#

Provides 75% damage resistance to fire, allowing bearer to rest assured in their inflammability.

Advanced Filtration #4#

Provides 80% resistance to gas damage and effects.

Unflinching #5#

Helps prevent helldivers from flinching when hit. Provides a higher armor rating. Markers placed on the *map* will generate radar scans every 2.0 turns.

Siege-Ready #4#

Increases reload speed of **primary** weapons so you might get a bonus turn after reloading if you roll a nat 10 or higher, slow loading weapons only take 1 turn to fully reload but you get a bonus turn if you roll a nat 18 or higher. Increases ammo capacity of all weapons by 20%. Does not affect weapon backpacks.

Acclimated #5#

Provides 50% resistance to fire, gas, acid, and arc damage.

Integrated Explosives #4#

Armor explodes 1 turn after the wearer dies. Increases initial inventory and holding capacity of **throwables** by +2.

Gunslinger #3#

Increases **sidearms** reload speed so you might get a **bonus turn** after reloading if you roll a **nat 8** or higher, slow loading weapons only take 1 turn to fully reload but you get a bonus turn if you roll a **nat 14** or higher. You can shoot your pistol the same turn as another weapon and empty the magazine of the sidearm only if you swap to the secondary.. Sidearm **recoil** reduced by **20%**.

Reinforced Epaulettes #4#

Increased reload speed of **primary** weapons so you might get a bonus turn after reloading if you roll a nat 10 or higher, slow loading weapons only take 1 turn to fully reload but you get a bonus turn if you roll a nat 18 or higher.. Gives wearer a **50%** chance to avoid greivous limb injury. Increases **melee** damage by **20%**.

Ballistic Padding #5#

Provides **25%** resistance to body damage. Provides **25%** resistance to **explosive** damage. Prevents **all damage from bleeding** if chest hemorrhages.

Adreno-Defibrillator #5#

Provides one-time, short-lived resuscitation upon death(3 of the **Helldiver's** turns), given that the **helldiver's** body is still intact. Increases **stim** duration by **2.0** turns. Provides **50%** resistance to **arc** damage.

Desert Stormer #4#

Provides **40%** resistance to **fire**, **gas**, **acid**, and **arc** damage. Increases throwing checks by +2.

Rock Solid #3#

Increases **melee damage** by **40%**. Bearer is more resistant to being knocked prone.

Reduced Signature #4#

Wearrer gets + **9** to all stealth checks.

Concussive

Padding(Hazmat/Grenadier/Reinforced)

Grenadier #3#

Provides **50%** resistance to **explosive** damage. Increases initial inventory and holding capacity of throwables by +2

Hazmat #4#

Provides **50%** resistance to **explosive** damage, and provides **25%** resistance to **gas** damage and effects. Sidearm recoil reduced by **30%**.

Reinforced #4#

Provides **50%** resistance to **explosive** damage. Provides a **higher armor rating**.

Oxygenator #1#

Increases walking and running speed and also decreases the required roll amount to 'dodge/dive/slide' value by **-1**. Also increases sliding duration and speed.

Democracy Protects #4#

50% chance to not die when taking lethal damage. Prevents all damage from bleeding if chest hemorrhages.

Feet First #4#

Wearer makes **50%** less noise when moving. Increases point of interest identification range by **30%**. Provides immunity to leg injuries.

Supplementary Adrenaline #2#

When the wearer takes damage, they regain some stamina. provides a **higher armor rating**.

Armor penetration

Adds the number/symbol in brackets next to the weapon name.

-1(no hitbox)

they cannot be hit

0(unarmored I)

fists will turn it into a corpse

1(unarmored II)

fists can hurt it badly

2(light)

requires more force than a fist to break through, AKA guns

3(medium)

somewhat hard to break

4(heavy)

hard to break

5(tank I)

very hard to break

6(tank II)

super Hard to break

7(tank III)

insanely hard to break

8(tank IV)

unimaginably hard break

9(tank V)

nearly impossible to break

X(tank VI)

almost indestructible

!(indestructible)

indestructible

Damage types

This adds parenthesis containing a combination of these letters after a number representing how much damage each bullet or effect does. It will not specify the DPS of the effect because it is the same dps for one effect.

Acid damage(+a)

{take 3 damage every time you take a turn while in effect for 4 turns, move 30% slower while effects are active}

Arc damage(+z)

{the arc damage a weapon deals}

Ballistic damage(+b)

{the damage from an individual bullet or projectile}

Explosion damage(+e)

{the damage from explosions}

Fire damage(+f#)

{does damage every turn while in effect for 3 turns after it inflicted and can not be stacked, inflicting it again just resets the timer.}

It does 100 damage per turn/second for normal fire and 200 as heavy fire/napalm(n).

It is inflicted by incendiary bullets, fire projectiles, when taking fire damage from beams or the ground and NOT taking fire damage from being lit on fire.

If a weapon in the curved brackets says the weapon is dealing fire dmg then it is counting the damage in dps unless it states the amount of rounds that can be used per turn, and in that case it does that much damage for every round.

If a stratagem inside the damage per mine or damage per shell OR damage per round says (f) or (n) it does the amount of damage that does per second while inflicted on that turn.

Impact damage(+i)

{falling damage}

Continuous laser(+l)

{laser's damage per second aka the damage you deal maximum in a turn which can be lowered if you want, not always continuous thats just it's name}

Melee damage(+m){punch, kick, bash, and slash damage}

Gas damage(+g)

{once inflicted 25-35 damage dealt every turn while in a cloud of gas depending on how high you or the enemy rolls. If you roll high it will be less damage, you only roll when entering a cloud, the damage dealt over time is constant and is decided by the roll made when entering the gas.}

Stratagems

Orbital Cannons/Strikes

[AP]{dmg, explosion radius, uses, shells per stratagem(+salvos), bombardment area size(optional)} all of them can destroy enemy spawners. Ballistic damage is the damage from shell impact unless it is bS(ballistic shrapnel but also bullshit) which is shrapnel that is within the explosion radius. explosion damage is all throughout the radius unlike ballistic. The shells per salvo all drop at different times which you will roll for (higher = all at once, roll a 1 and its one salvo per second). Weapons whose PP decreases on less direct hits by 1 for an indirect hit will have a - on the armor pen, -- means by 2 for an indirect hit.

Emplacements(Defensive/Utility)

Damage is per mine, or per round, for mines it is {dmg per mine, explosion radius, mine placement radius, mine number if it differs from 48}, there are always 48 mines. For the shield it measured hp instead of AP, and {hp regen/second, duration} instead of normal. Emplacements/battlements are measured in the same as turrets {damage per round, total rounds, rounds per turn}

- Brings back all dead helldivers as long as there are enough for all of them

Resupply

- Places 4 boxes of supplies that refill any not expendable weapon or weapon backpack to max, supply backpack is refilled by 1.

SOS beacon

- Calls in the dm to start cooking because you decided to fight a hive lord or something fucking stupid like that so he can take care of it for you and then dissappear.
- You need to be below 3 reinforcements, the main objective cannot be completed when you call this in, lastly you need to promise to stay hidden somewhere and let the dm cook, he also has to be

in a good mood so dont interrupt him EVERY FIVE MINUTES!!!

- He will spawn and give you +10 reinforcements, remove all stratagem cooldown, and if you lost a support weapon from death or it exploded he will bless you with the support weapon that you lost, if you have one euquipped already that you actively have the stratagem for even if its on cooldown then he won't give you a new one of those because gluttony is stated to be one of the super sins as stated by the federation.

Eagle rearm

- Rearms the eagle after you use a few of a certain eagle airstrike

Objective Stratagems

Level 1

NUX-223 hellbomb

- Big explosion, depending on where or what you are doing it will be stronger or weaker(plot dependant because i said so)

Upload data

- You use a stratagem code to upload data, yes that is it.

SSSD delivery

- Get a objective required ssd delivered right to where you place it.

Super earth flag

- Call down th beautiful, amazing, glorious, wonderful flag of super earth to watch it raise at a slow pace, this is so you can admire it as it reaches for the stars you've sought to protect.

Seismic probe

- No not that type of probe you weirdo!!!
- Check the earth for minerals super earth needs to spread democracy at a decent speed.

Prospecting drill

- You send a drill into the earth with 6 stages of prep, code 1, wait 5 minutes, code 2, wait 4 minutes and 59.999 seconds, code 3, wait like forever for it to finish and send the results back to the super destroyer.

Dark fluid vessel

- Pretty sure we stopped using this once it turned a planet into a black hole and let the illuminate invade the galaxy.
- It just extracts the dark fluid from hive plants.

Tectonic drill

- It works similarly to a prospecting drill but im pretty sure this one makes a massive explosion when its done drilling

Hive breaker drill

- This one is used to blow up hives in hive worlds with a big kaboom underground placed by the drill.

Cargo container

- Call in a cargo container for you to put the automaton's platinum and fusion batteries in. we needed it more than them anyways.

Reinforcement pods

- Use this to activate a reinforcement pod on a commando mission.

SEAF artillery

- You set up the massive missile launcher, then youre allowed to use it any time, but you only get the five shots that you loaded in.

Enemies

Enemy-Spawn:

...

Enemy-List:

They will have [AC, fatality(s/f)] (part hp, amount of the part they have) the enemy will have: ^ attack damage(type)and will also have: {Dif}.

- Class-System: unarmored, light, medium, heavy, tank
- Damage system: all damage is transferred to the main hp pool so if you repeatedly miss a vital spot the enemy might just die either way.
- Note that main is the main hp pool of the entire enemy, Main{#} can be used as a variable to say that any damage dealt here, #% of that damage is dealt to main. So if # is {250} then it does 250% of the damage dealt to that directly to its main hp, the part does

not get damaged because all the damage is transferred to main.

Terminid

- Terminid-Strains: **predator**, **spore burst**, **rupture**, **Bile**.
- S = slash, P = pounce, T = tongue, V = acid spewing, DE = death explosion, D = dive, R = ragdoll, C = charge, B = Bile spew, BA = Bile artillery, ST = stomp, TR = trample, EC = end charge, TS = tentacle slash, TI = tentacle impact, FB = fire breath, BW = burrow, SU = surfacing, GS = ground/body slam, BR = bile rain, RI = rock impact, SP = spit, U = unburrow, BB = bile bomb, BG = bile globules, UE = unburrowing explosion/emerging explosion.
- dmg.A means it's an aoe.
- PA stands for plate armor
- PR means it is the predator strain version of a terminid.
- SR means it is a spore burst enemy variety.
- RT means it is a rupture strain of an enemy.
- BL means it is an enemy's bile variety which means it either shoots acid or explodes into acid when it dies and the bile tag only applies when the terminid is a mutated version of another,
- AE means it is an aeronautical version of an enemy, this is unless it has no enemy of the same faction with an identical number, in simpler terms this means something that was a ground hugger before... is able to fly.
- DF means it is a stronger version of it that only appears in harder difficulties, this does not change its appearance but does increase some stats.
- AL AKA an alpha variant which does the same thing as -diff but changes the appearance.

Description

They have good strategy until you realize that they will funnel in between 2 pieces of cover if you go through it, allowing you to drop a grenade and kill them all. They have the scariest types of enemies though, theyre ranged, the cyborgs, incineration corps, and jetpack brigade fucking SUUUUCK. Also formatted like terminids.

Brigades/Variants

- Automoton Regiments: jetpack brigade, cyborg leigon, incineration corps
- JB = jetpack brigade
- CY = cyborg legion member
- IC = incendiary corps member
- HV = heavy variant
- DF = difficulty buffed variant
- RL = rocket launching variant(if they dont already launch them)
- SC = scorcher variant because they arent in the incendiary corps
- HE = high energy variant aka faster/shoots faster/shoots harder

Master Divemaster Major Omega Obscurity

(side note that "Master Divemaster Major Omega" is a real rank in hd2 but i doubt you guys will reach lvl 260 in this campaign)

this absolute beast of a helldiver can:

reload without wasting a turn

has extra hp

Has every weapon unlocked

they have 2 different primaries, 2 different secondaries, 2 support weapons, and 3 support packs(excluding support weapon backpacks)

that he has equipped all at the same time

He has 2 of each primary and secondary and dual wields them with the efficiency of a single one weapon that has buffed handling(+2 on accuracy check).

He can also move while shooting stationary weapons.

HE WILL ONLY DROP DOWN IN YOU GUYS ARE TRYING TO KILL EACH OTHER OR OTHER PLOT IMPORTANT REASONS

He also gets double the supply boxes from the supply pack, two guard dogs of HIS CHOICE SOMEHOW from one guard dog pack, can detonate the hellomb backpack once without damage then do it again 2 more times and can only be killed on the last charge(not refillable).

Unlocking Items

In between two ## signs it will show the required skill tier AKA skill level to purchase that item or any items of a category. You start at level 0. We will not be adding strategems. For those of you who keep asking, democracy has stopped endorsing microtransactions, you can thank your democracy officer who was in charge of this project.
